

INDEX DESCRIPTION

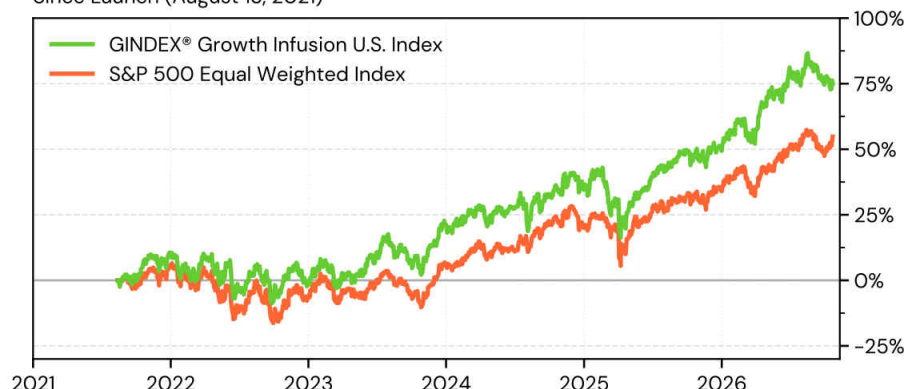

The GINDEX[®] Growth Infusion U.S. Index (GNDX) tracks U.S.-domiciled acquirers that have taken 100% stakes in companies newly public via IPO, Direct Listing, or Spin-off worldwide ("IPO M&A"). Designed to capture growth from integrating newly public innovation, the index is equally weighted and reconstituted and adjusted quarterly. It provides cross-sector diversification and complements core U.S. equity exposure by targeting established firms acquiring innovators through IPO M&A. Eligibility excludes partial acquisitions, ADRs, and SPAC targets.

FACTOR EXPOSURE

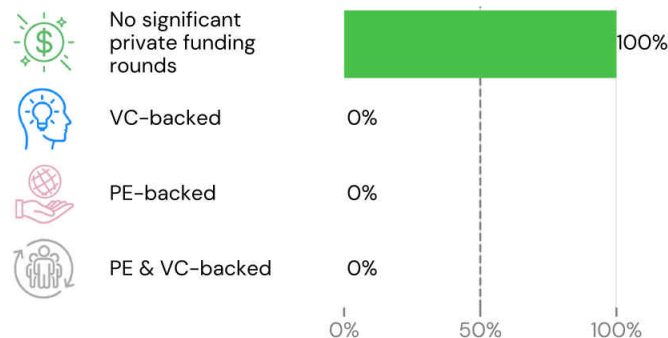

IPOX uses the 12-month beta coefficients as the factor exposure whereby IPOX excess returns to the S&P 500 Equal Weighted Index are regressed against a set of MSCI factor indices. This differs from the fundamental factor model, e.g. BARRA or Axioma model that are based on cross-sectional ranking and are generally in z-score form.
